Platform Admin	Admin: Analytics	/admin/analytics	200	OK	Rendered as expected
Platform Admin	Admin: Flags	/admin/flags	200	OK	Rendered as expected
Platform Admin	Admin: Promotions (not built per ROUTES.md)	/admin/promotions	404	OK	Expected per ROUTES.md (☐ not built yet) — consistent with docs, not a defect.

Top 10 for attention

1. Documented-public routes require login

`/discover`, `/people/[id]`, `/companies/[id]` all listed in `ROUTES.md` as public — all three redirect to `/auth` when logged out. Any shared profile/company link is effectively a login wall.

2. Wrong-role access strands users in candidate onboarding

Confirmed 3 ways: Recruiter → admin/team → `/dashboard` → `/onboarding`; Recruiter/CA → `interviews/mine` → same chain; HM → `talent/postings/dashboard` → `/enterprise/onboarding`. Root cause confirmed in code: `CompanyAdminShell.tsx:47` redirects to the "retired" `/dashboard` route, which still runs the `candidate requireOnboarded()` check.

3. Interview list pages don't exist (404), despite `ROUTES.md` saying they do

`/interviews` and `/enterprise/interviews` both 404 — only the `[applicationId]` detail sub-route was ever built. The detail page works fine directly but nothing in the UI links to it (Applications page's interview row and "Schedule" button both stay on `/applications/[id]`).

4. Nav prefetches an unbuilt route on nearly every page load

18 of 65 captures show the same console 404 for `/work/saved?_rsc=...` — the candidate nav links to a route `ROUTES.md` documents as not yet built, so Next.js prefetches it in the background everywhere that nav renders.

5. List cards use `onClick` divs, not real links

Applications, Marketplace, and Companies cards have no `<a href>` at all — client-side `onClick` navigation only. No open-in-new-tab, no crawlable href. Keyboard-focus behavior not verified this pass.

6. Onboarding is silently re-enterable

An already-fully-onboarded talent account visiting `/onboarding` directly sees a blank "What should we call you?" step 1, not pre-filled, no redirect to `/home`.

7. Real routes untracked in ROUTES.md

`/enterprise/admin/consent`, `/enterprise/messages`, `/enterprise/interviews/mine` (+ detail), `/jobs/[id]` all render live but aren't in ROUTES.md's table. `/dashboard` is documented "deleted" but is still live and load-bearing (see #2).

8. ROUTES.md's HM access note is stale

Doc says HM "shares the general `/interviews` route." Live: HM lands directly on the dedicated `/enterprise/interviews/mine` on login, matching TEST-LOGINS.md instead.

9. Unauthorized pages fire multiple failed API calls before redirecting

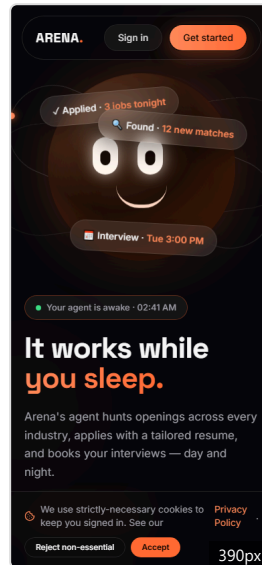

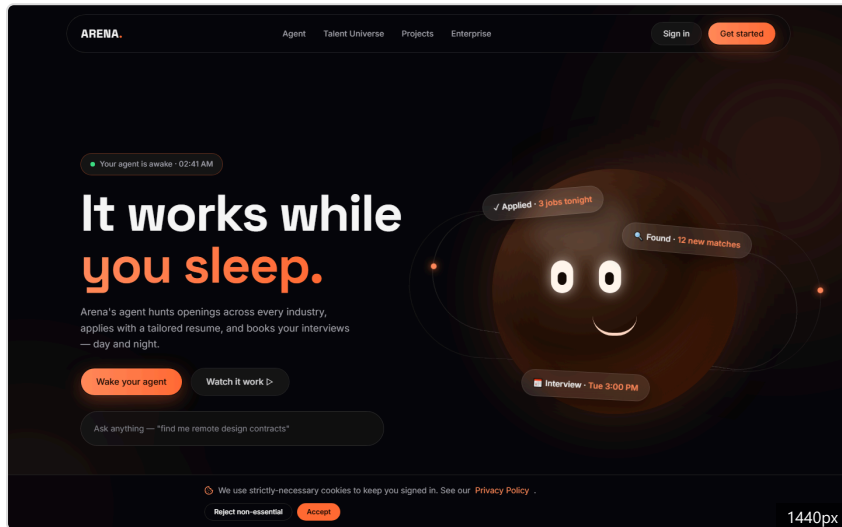

HM on `/enterprise/admin/team`: 6 separate console errors before the redirect completed — several parallel fetches each independently 403, rather than one guard check stopping all of them upfront.

10. `/admin/tenants` has no discoverable detail view

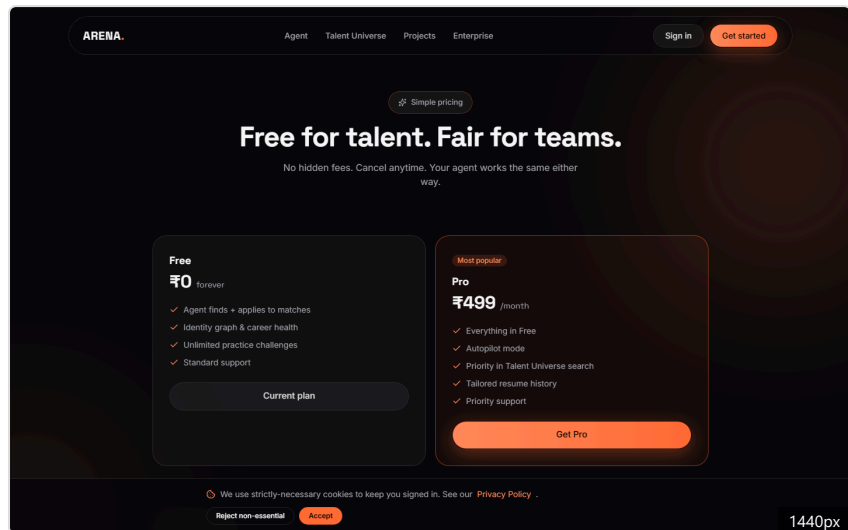

Tenant list renders correctly with real data; clicking rows/action buttons didn't surface a tenant detail route this pass. Not confirmed broken — flagged for a manual check.
